

Rudy Sen

TECHNICAL ARTIST | AI & 3D VFX

Los Angeles, CA | 818-515-1516 | rudhraingame@gmail.com
rudysen.com | linkedin.com/in/rudhra-s-ab3aba192

Profile

Technical artist combining a background in photorealistic 3D production with hands-on AI workflow development. Builds ComfyUI workflows and custom nodes, trains specialized LoRA models, and works across local and frontier models. Brings artistic judgment, Python automation, and production experience at Apple to visual storytelling and practical tools for artists.

AI & Technical Art Experience

Freelance Technical Artist | AI & 3D VFX

Freelance projects | Commercials, film & real-time production

- **USC Entertainment Technology Center (ETC@USC):** Contribute as an AI VFX Artist to ongoing projects.
- **Commercial restoration:** Upscaled and restored footage using custom ComfyUI workflows, with manual cleanup and color correction in Adobe Premiere Pro.
- **Unreal Engine MetaHuman:** Contributed custom models, outfits, hair, textures, materials, and rigging.
- **Architectural visualization:** Created an animated walkthrough and a complete set of marketing assets.
- Currently working on a micro-drama series and a film based on the same script, with character integration into live-action footage.
- Build custom ComfyUI workflows for image and video generation, motion control, and hybrid CG/AI production across independent film and visual projects.
- Develop custom ComfyUI nodes and reusable workflow components to extend creative control and support production needs.
- Train character, style, and concept LoRAs using AI Toolkit; publish selected models on CivitAI.
- Evaluate local open-source and frontier models for creative tasks, testing output quality and workflow integration.
- Create and publish visual content across three channels, combining direction, story development, AI generation, sound design, and editing.

Professional Experience

Pixxel18Studios | 3D Visual Designer

Los Angeles, CA | July 2025–Present

- Create photorealistic environments, models, materials, and lighting for commercial and industrial visualization.
- Deliver rendered imagery and animation through iterative reviews with art directors and clients, maintaining visual consistency and meeting production deadlines.

Apple | 3D Generalist / Production Manager IV

Cupertino, CA | July 2024–June 2025

- Developed Python tools to automate scene-building and camera setup, reducing production time by 60%.
- Reviewed visual quality and performance across 1,000+ 3D projects, identifying issues and guiding improvements.
- Created 300+ photorealistic scenes, applying lighting, materials, and composition to varied visual themes.

Apple | 3D Generalist / R&D Outsourcing Artist

Cupertino, CA | January 2022–January 2024

- Created reference scenes and visual style guides to communicate artistic standards to external production teams.
- Reviewed outsourced artwork and provided actionable feedback on visual quality, consistency, and asset performance.
- Built and optimized 3D assets and scenes for internal R&D, balancing visual fidelity with technical requirements.

Leavitt Architecture | 3D Visualizer

San Francisco, CA | November 2018–December 2021

- Built architectural environments, furniture, and detailed assets for client presentations; produced final imagery using realistic lighting, materials, and composition.

Selected VFX Project

Eternal Ale | Original Spec Commercial

Writer, Director, Producer & VFX Artist | 2025–2026

- Developed a 90-second commercial from concept through live-action production, including the script, visual identity, character design, and a 20-shot technical storyboard.
- Directed the shoot and developed CG/VFX integration for a story that moves from psychological horror to deadpan comedy.

Technical Skills

AI workflows: ComfyUI, custom nodes, LoRA training, local and frontier models, model evaluation, ControlNet, IP-Adapter, inpainting, upscaling.

Model tools: Ai Toolkit, ComfyUI.

3D & VFX: Maya, Blender, 3ds Max, Houdini, Unreal Engine, V-Ray, Substance Painter, Photoshop; environments, hard-surface modeling, PBR materials, lighting, rendering, CG integration.

Technical art & production: Python, MEL, procedural workflows, asset optimization, visual standards, storyboarding, directing, camera operation.

Education

Gnomon School of Visual Effects | Alumni

Studies in visual effects, procedural content creation, advanced texturing, and digital filmmaking.

UCLA Extension | Alumni

Computer Graphics | 2021

Vancouver Institute of Media Arts

Game Art & Design | 2019

Maya Academy of Advanced Cinematics

3D Design | 2014

Additional training: Technical Artist for Games, ELTVR | 2024

Selected Awards

Gold, 100 Hours Animation Competition, MAAC | 2015

Gold, 11th Annual International 3D Short Film Awards, MAAC | 2014
